

SHADE LOVING PLANTS

Different plants will grow in varying amounts of shade. Plants that would normally bloom in full sun will probably grow in shade, but they won't bloom or look as good as they would in the sun. Full shade is usually defined as either no sun, or only a few hours of indirect light each day. Half shade would be either morning sun for 2-4 hours or filtered sun all day long.

EVERGREENS:

VIBURNUM
CANADIAN HEMLOCK
GIANT ARBORVITAE
YEWS
SKIMMIA
LEUCOTHOE
MAHONIA
OSMANTHUS
PIERIS
AZALEAS
RHODODENDRON
CAMELLIAS
KALMIA
RUSSIAN CYPRESS
BOXWOOD
EUONYMOUS

DECIDUOUS:

ITEA
KERRIA
CALYCANTHUS
CLETHRA
ENKIANTHUS
ORNAMENTAL GRASSES
FOTHERGILLA
WITCH HAZEL
HYDRANGEA

TREES:

STEWARTIA
JAPANESE MAPLES
AMERICAN HORNBEAM
REDBUD
DOGWOOD

GROUNDCOVERS:

VINCA/MYRTLE
AJUGA
PACHYSANDRA
IVY
RUBUS
SARCOCOCCA

ANNUALS:

IMPATIENS
BEGONIAS
COLEUS
HELIOTROPE
CALADIUMS
BROWALIA
